

# My Travels in the US and Canada

# My Travels So Far

Years ago, I built my first simulation model of population dynamics the United States. I resolved to see the population centers I knew so well though data. I drafted my first list of places to visit before I could say that I had truly and thoroughly traveled the country. Since then, I have traveled over MISSING miles and my list has grown to include 128 metropolitan areas in all 50 states, plus DC, Puerto Rico, and adjacent areas of Canada.

This information dashboard tracks my past progress towards achieving that goal, and provides planning information for my future efforts.

Unvisited

Visited

Progress Toward Goal

These bar charts measure progress towards visiting (and taking pictures) each metropolitan area and state on my list. I consider an area “visited” if I have walked in it for at least an hour.

This map charts my past road and train travels. It also depicts all the metropolitan areas on my list. The color indicates whether the area is unvisited, visited, or visited and photographed. In total, I have visited 35 states and 69 listed areas, accomplishing 53% of my travel goal.

## Opportunity For Goal Progress

## Map of Planned Routes

## Planned Route Information

Map counts nearby unvisited and unphotographed cities.

Map shows a 12-route plan for seeing nearly all listed areas.
